

## 230350320047\_Amruta Khandare\_LPS3

Q1:

```
import java.util.Scanner;
```

```
public class PositiveNegative
```

```
{
```

```
    public static void main(String[] args) {
```

```
        System.out.println("Enter a number: ");
```

```
        Scanner sc = new Scanner(System.in);
```

```
        int a = sc.nextInt();
```

```
        if(a > 0)
```

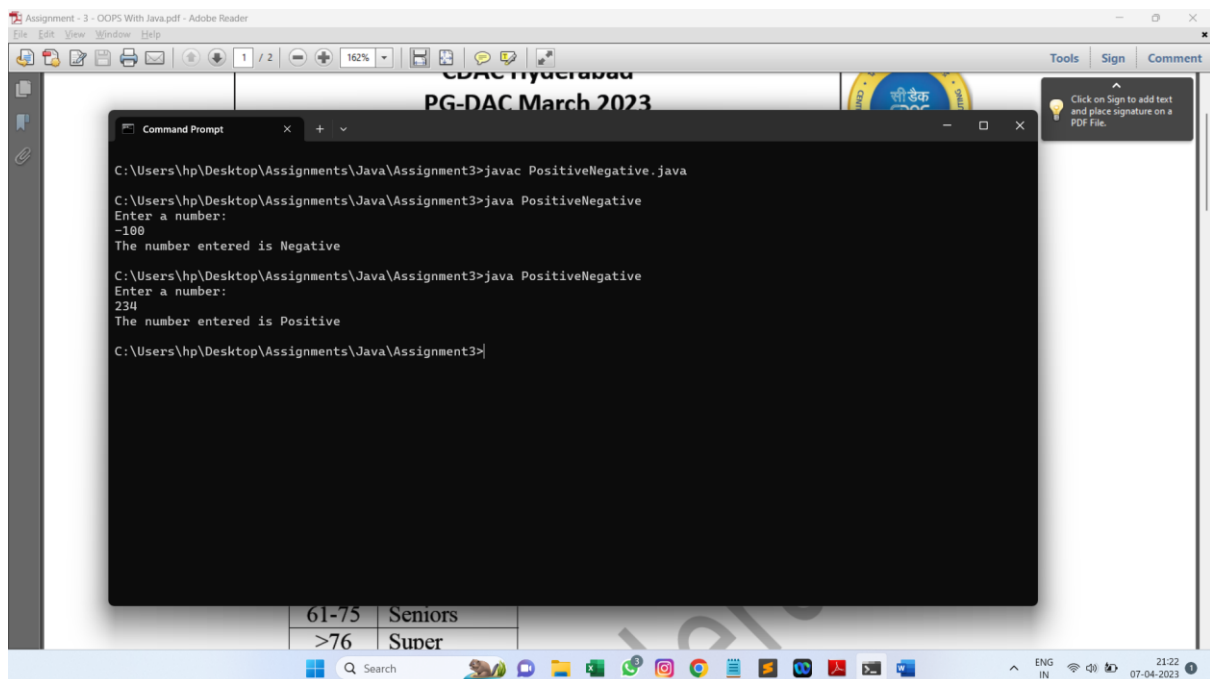

```
            System.out.println("The number entered is Positive");
```

```
        else
```

```
            System.out.println("The number entered is Negative");
```

```
    }
```

```
}
```

Q2:

```
import java.util.Scanner;
```

```
public class Age
```

```
{
```

```
    public static void main(String[] args) {
```

```
        Scanner sc = new Scanner(System.in);
```

```
        System.out.print("Enter the age of Person: " + age);
```

```
        int age = sc.nextInt();
```

```
        if(age <= 3){
```

```
            System.out.print("\nYou are Toddlers");
```

```
        }
```

```
        else if(4 <=age && age <= 8){
```

```
            System.out.print("\nYou are Kids");
```

```
        }
```

```
        else if(9 <=age && age <= 12){
```

```
            System.out.print("\nYou are Child");
```

```
        }
```

```
        else if(13 <=age && age <= 18){
```

```
            System.out.print("\nYou are Teens");
```

```
        }
```

```
        else if(19 <=age && age <= 40){
```

```
            System.out.print("\nYou are Adults");
```

```
        }
```

```
        else if(41 <=age && age <= 60){
```

```
            System.out.print("\nYou are Matured Adults");
```

```
        }
```

```

    else if(61 <=age && age <= 75){
        System.out.print("\nYou are Seniors");
    }

    else

        System.out.print("\nYou are Super Seniors");

    }

}

```

Q3:

```
public class CozaLozaWoza
{
    public static void main(String[] args) {
        int i, j, count = 0;
        for(i = 1; i <= 110; i++){
            if(i % 3 == 0 && i % 5 == 0){
                System.out.print("CozaLoza ");
                count++;
            }
            else if(i % 3 == 0){
                System.out.print("Coza ");
                count++;
            }
            else if(i % 5 == 0){
                System.out.print("Loza ");
                count++;
            }
            else if(i % 7 == 0){
                System.out.print("Woza ");
                count++;
            }
            else{
                System.out.print(i + " ");
                count++;
            }
        }
    }
}
```

The screenshot shows a Windows 10 desktop environment. On the left, the File Explorer sidebar is visible, showing the navigation pane with 'This PC' and 'Network' options. The main pane displays the file structure: Desktop > Assignments > Java > Assignment3. The 'Assignment3' folder is selected, showing its contents: '01-90', 'Assignment4', 'Assignment2', 'Assignment3', and 'Assignment3'.

In the center, a Command Prompt window is open, displaying the following commands and output:

```
C:\Users\hp\Desktop\Assignments\Java\Assignment3>javac CozaLozaWoza.java
C:\Users\hp\Desktop\Assignments\Java\Assignment3>java CozaLozaWoza
1 2 Coza 4 Loza Coza Woza 8 Coza Loza 11
Coza 13 Woza CozaLoza 16 17 Coza 19 Loza Coza 22
23 Coza Loza 26 Coza Woza 29 CozaLoza 31 32 Coza
34 Loza Coza 37 38 Coza Loza 41 Coza 43 44
CozaLoza 46 47 Coza Woza Loza Coza 52 53 Coza Loza
Woza Coza 58 59 CozaLoza 61 62 Coza 64 Loza Coza
67 68 Coza Loza 71 Coza 73 74 CozaLoza 76 Woza
Coza 79 Loza Coza 82 83 Coza Loza 86 Coza 88
89 CozaLoza Woza 92 Coza 94 Loza Coza 97 Woza Coza
Loza 101 Coza 103 104 CozaLoza 106 107 Coza 109 Loza
C:\Users\hp\Desktop\Assignments\Java\Assignment3>
```

The taskbar at the bottom shows the system clock as 21:24 on 07-04-2023, along with various system icons and the Windows Start button.

Q4:

```
import java.util.Scanner;
```

```
public class Prime
```

```
{
```

```
    public static void main(String[] args) {
```

```
        Scanner sc = new Scanner(System.in);
```

```
        System.out.println("Enter the number: ");
```

```
        int n = sc.nextInt();
```

```
        int i, count = 0;
```

```
        for(i = 1; i <= n; i++){
```

```
            if(n % i == 0)
```

```
                count++;
```

```
        }
```

```
        if(count > 2){
```

```
            System.out.println("The number entered is Not Prime");
```

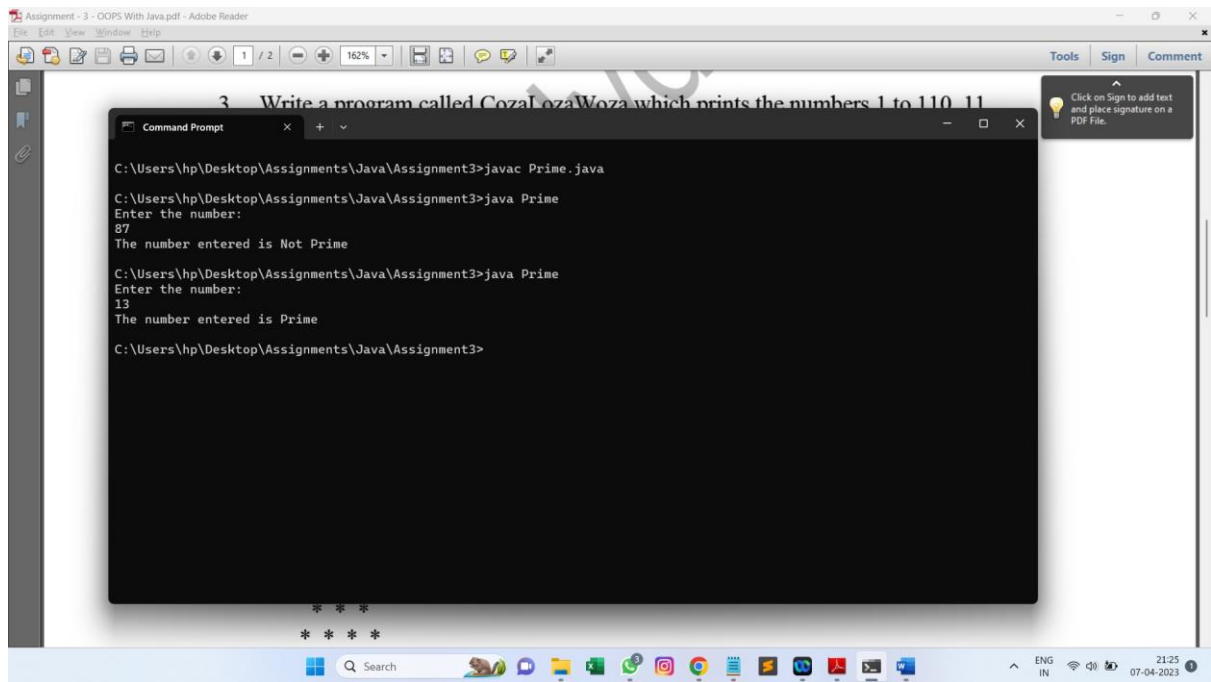

```
        }
```

```
        else{
```

```
            System.out.println("The number entered is Prime");
```

```
        }
```

```
    }}
```

Q5:

```
import java.util.Scanner;
```

```
public class Star
```

```
{
```

```
    public static void main(String[] args) {
```

```
        Scanner sc = new Scanner(System.in);
```

```
        int n = sc.nextInt();
```

```
        for(int i = 0;i<n;i++){
```

```
            for(int j = n-i;j>1;j--){
```

```
                System.out.print(" ");
```

```
            }
```

```
            for(int j = 0;j<=i;j++){
```

```
                System.out.print("* ");
```

```
            }
```

```
            System.out.println();
```

```
        }
```

```
    }
```

Q6:

```
import java.util.Scanner;
